**ROADMAP 13**

## INTRODUCTION

**B**anana Banana is a meme token created to create user fun and happiness through its memes and fun-based utilities. Banana Banana Fun Token (BBFT) is inspired by funny moments, posts, jokes, and other memes on social media or other community groups based on blockchain. BBFT will cover the moments moments through the memes and create opportunities for users and investors to earn vast amounts of money. This token brings opportunities to the users through its mission to make people capable of living everyday life along with quality moments.

Banana Banana intends to demystify cryptocurrency for the people while simultaneously assisting consumers in locating sources of entertainment and fun.

## WHAT ARE MEME TOKENS ?

Banana Banana is a meme token which is created with a purpose to bring fun and entertainment in the life. With Banana Banana's perspective, Meme tokens are a type of cryptocurrency modeled after memes or jokes that are popular on the internet and other social media platforms. Meme tokens are notorious for their extreme degree of price swings. They are primarily community-driven and have the potential to gain popularity overnight, thanks to the endorsements of online communities and the fear of missing out (FOMO). Traders may shift their focus to other meme tokens, which may cause the price of these tokens to drop abruptly.

One such attribute of meme currencies is that they frequently feature a massive or limitless supply of currency. Because meme tokens generally do not have a mechanism for coin-burning, the vast Supply explains why their prices are so much lower than other digital currencies. You can purchase millions of meme tokens with just one \$1 (USD).

## VISION

**T**he Banana Banana Token is driven in part by the feelings of their separate communities and the possible money that could be made. As was noted, Banana Banana Token is designed to be humorous and is sometimes seen as an "inside joke" for a particular particular community. Popular Internet memes inspire it. When you buy BBFT, you effectively demonstrate your community support.

## ECOSYSTEM

**T**he **Banana Banana** Token is perfectly crafted as a meme token with a mission to build a strong and vast community to make the moments precious and joyful through the fun tokens of BBFT. The ecosystem of **Banana Banana** entails a reasonable amount of liquidity, which will help people get rich and live prosperous and harmonious lives. It brings different rewards for the users and investors to make a robust community.

### • STRONG COMMUNITY

**Banana Banana** is a decentralized platform whose exciting and active community owns it. To develop BBFT into the most well-rounded community in the cryptocurrency space, we encourage members to share their unique points of view. With the altruistic goal of spreading joy and happiness to people worldwide through increased affluence.

The importance of **Banana Banana** community is emphasized throughout the BBFT ecosystem. When **Banana Banana** started, one of our first questions was whether a project could succeed with a decentralized, community-based effort. BBFT's power and strength come from the members of the community as well as its investors, which gives it the status of a privileged platform with the collaboration of the community that serves as the project's soul.

### • REWARDS

In **Banana Banana**, there are various reward structures available through loyalty reward programs that award BBFT. It is necessary for Banana Banana users and investors to participate in the community and devote some of their time to creating and disseminating memes and funds. This indicates that you can earn additional BBFT simply by keeping it in your wallet.

## ● LIQUIDITY

**Banana Banana** features liquidity to keep a certain amount of tokens in volatility to keep a balance in the market. Those who spread liquidity receive LP tokens as compensation. Customers of Banana Banana settle their balances on DEX, which are subsequently assigned to liquidity providers. This is determined by the proportion of the pool they own in Banana Banana token.

Consequently, LP may experience a minor cash shortage. In addition, they are not permitted to retain their cash or tokens. BBFT ensures that purchases made by token owners are immediately reserved for liquidity. The primary goal is to communicate with stockholders about the success while avoiding Whale declines. It is self-contained, and our goal is to give the owners a facility that serves two purposes. Once a stable price has been established, the contractors collect tokens from individuals who sell them and deposit them into the Lp.

Second, this is a fluctuation barrier, guaranteeing that the owners' price remains stable. In addition to replicating the process, cost stability provides owners with a platform for contingent costs. The principal purpose is to prevent a hyper-distribution

## BBFT FEATURES

### ● TRANSPARENCY & IMMUTABILITY

Blockchain-based working records are part of the BBFT ecosystem. An audit trail is supplied to follow where the BBFT came from. Banana Banana can assist with security and prevent fraud in enterprises associated with exchanges, and check the legality of swapped assets.

### ● SECURITY

Trustworthiness, safety, and security are at the forefront of our priorities in **Banana Banana** Ecosystem. **Banana Banana** technology, based on Blockchain and smart contracts, offers many benefits, each of which makes it increasingly harder to circumvent its security measures. Banana Banana can stay in business by remaining on the bleeding edge of technological protection.

## ● GAS FEES

While using **Banana Banana** Blockchain, the community member and users must pay the gas fee to track the execution cost. BBFT's working patterns are similar to Ethereum gas's in that every EVM instruction costs the same amount of gas as it would on Ethereum and uses a low gas fee, making it unique compared to another blockchain.

## ● BLOCKCHAIN COMPLIANT

The Community of **Banana Banana** is a rewarding platform created to facilitate holders and is compliant with the blockchain. Every activity on the site of **Banana Banana** is backed by the blockchain and is fraud-proof.

## Why BBFT ?

### ● TRANSPARENCY & IMMUTABILITY

Each time an exchange of tokens is recorded on the BBFT platform's blockchain, an audit trail is created to determine where the tickets originated. **Banana Banana** Token's feature can aid in enhancing security and preventing fraud in exchange-related firms, as well as in validating the legitimacy of the assets being traded.

### ● LOWER FEES

Compared to the fees associated with debit and credit cards, as well as wire transfers and BACS payments, the fees related to **Banana Banana** token transactions are significantly lower.

### ● TRANSACTION TRACEABILITY

Although each new transaction in **Banana Banana** is encrypted and linked to the one that came before it, BBFT offers far higher levels of data protection than conventional record-keeping systems. It is impossible to make any changes to **Banana Banana** Token because it is constructed from a convoluted series of mathematical numbers. Due to the immutable and incorruptible nature of Centaurify, **Banana Banana** is immune to being hacked or having its information tampered with after it has been constructed.

## ● EASE OF USE

The value of BBFT can be attributed to how simple it is to use. You may start investing immediately in **Banana Banana** if you have a mobile device and access to the internet. All you need to get started is a smart device and connect to **Banana Banana**.

## ● TRUST

Trust is the most important factor for **Banana Banana** to establish a developed and motivated community in the cryptocurrency business. **Banana Banana** token calls for complete openness not only in how the community is supported and developed but also in how any security measures are taken. Some examples include doing high-quality audits on the code for Ethereum Chain tokens and destroying liquidity tokens to cut the danger of any malicious action drastically.

## ● LONGEVITY

BBFT is committed to seeing this through to the end. The decentralized community is working to encourage the **Banana Banana** ecosystem's long-term development, which will lead to the creation of actual use cases, increased rewards, and increased popularity.
